Judgement Primary School
Opening Convocation
At the gym

But we understood

这里,是战场!

This is battlefield!

Today's the
Opening Convocation

It's the best chance to
defeat Heaven Fucker Zhao.

Hey you three
over there!

?

By your looks you
must be newcomers
right?

How unfortunate.

You poor things met me on the first day...

Let this [Newcomer Hunter] show you how terrifying the Judgement Primary School is using my ultimate move, [Newcomer Guillotine].

In other words, Heaven Fucker Zhao would show up there as well.

It would be difficult to take care of him after school starts.

Our best chance is to catch him unguarded backstage!

I'm sorry!
I didn't
mean it!

Are you
OK?

I'm fine...

I couldn't find the gym, so I was in a hurry. It's my fault for not watching the way and bumping into you.

Bye.

Wait!

Can't find the gym.
You must be a new student too right?

Yeah.

Okay~

Call me Moe or
Mengmeng!
What about you?

It's the school
doctor last night

Ah, you three people.
I checked last night,
you're all perfectly
healthy.

Just go in.

Hey girl, come here
for checking.

Ah OK.

Perfectly healthy.
just go in.

I didn't even
go to your desk!

What kind of perfunctory health check is that?

It's not what you think...

It may seem perfunctory but actually the school doctor masters the art of medical skills so well that she can know a person's health conditions with merely one simple glimpse...

Really?

Yes, we saw that with our own eyes last night when she was treating Devil Exorcist...

Hey girl, you have
really high myopia...

Do you want
to cure it?

Ah? Of course...

!!?

Wah~ why did you
fan my face all of
a sudden?

Cl.

Sits
down

OK~just go backstage
and register yourselves

Aaahhhh! I can see things clearly! Why?

She could perform a myopia correction surgery within a blink, what amazing skills...

Myopia correction surgery?

Myopia correction surgery is not
as mystic as it is commonly perceived...

The main part is cutting out a 'concave lens'
on the cornea according to the degree of myopia.

Just like attaching a lens to the eyeball,
through which myopia could be corrected!

She is indeed excellent for
performing such a precise
operation within a blink.

TM Consult an ophthalmologist for relevant medical information

You do know a lot

How rare...

How can someone expect that,
these four...

I think you look
better with glasses

Really?

all have that 'power'...
